

**VECKA 1:** Bestäm projekt, preliminärt GUI, user stories, prototyping, samt workshop  
Maven/Git

## Meeting Agenda (Group: Alpha)

**Date:** 2020-09-04

**Chair:** Bashar Oumari

**Participants:** Sophia Pham, Benjamin Sannholm, Mathias Drage, Pontus Nellgård, Bashar Oumari

## Objectives (5 min)

- Choose project
- Preliminary GUI
- User stories

### Reports (15 min) from previous meeting

- Supervision
- Simple GUI prototypes were created for the two project ideas (Mathias/Bashar)
- We detailed some basic functionality (Pontus/Mathias)
- Basic User stories

### Discussion items (35 min)

- The Check-In App was a good idea but Felix mentioned that it could be a bit too ambitious. The issues would be what Database, GUI, Model Function and Network to get. So this project could be a bit too much to do in a couple of weeks.
- The Telefon App (LOST) we could use the API from google but it might not be as fun if we just use it in a simulation because we want to use Android Studio and most of us use iPhones.
- What GUI to use

### Outcomes and assignments (5 min)

- We decided The Telefon App (LOST) to be our project.
- We decided to use Android Studio to develop the GUI application.
- Everyone will research Android Studio and GitHub project boards to become more familiar.
- We have begun writing user stories and basic functionality.
- Someone will set up an Android project with Gradle in the repository.

## Wrap up

- Team meeting monday 7/9 at 15:15 on Discord
- The location and time for the next supervision meeting will be on Discord, Thursday 10/9-2020 at 15:15.
- Refine functionality and user stories
- Discuss UML at the next meeting.

### **Feedback from Felix during supervisor meeting (4/9):**

- Check In App: Jag gillar det men den kan vara lite för ambitiös. t.ex. Databas? Model-funktion som ska på plats samt GUI. + Nätverk?
- Telefon App: Mindre ambitiös, denna API:n kan man sno från Google. Kanske inte jätteroligt att köra enbart i en simulation. + Nätverk?
- Gör en grupprapport varje vecka m. reflektioner osv. Separat branch? i ett git repo. ej i egen mapp
- Möte ~~onsdag 13:15~~ m. handledare, torsdag 15:15
- API
