Comments from Supervisor Felix:

- Issues med testing: det är alltid bra att veta vad problemen beror på.
- Move BroadcastRepository into persistence instead of BroadcastRepositoryProvider
- Maybe add ActiveBroadcastService to domain model. Actually no, skip it.
- Vi har skrivit en egen Databas, men databasen använder sig av -> Firebase, ha firebase ändå, smyg in abstraktionen om dt går bra
- För MVVM, möjligtvis lite exempel på konkret vad som tillhör vad
- RADen var typ perfekt
